- Experience teams in all facets of work.
- Extensive portfolio via photographs and computerized designs.

- *Designer-Owner: Denis Willaert*  
- *Certified Landscape Designer*  
- *28 years experience in the green industry.*

## **Why Design?**

A well designed and properly installed landscape can avoid many pitfalls and increase your property value by 17%. A poorly conceived and executed landscape can decrease property value, waste considerable time and money.

With my expert care and attention to detail I can tailor our Landscape Design to suit your individual garden needs and budget. A fully integrated service means that you only ever need to go one place for all your new landscape needs.

## **Design Process:**

1. First free meeting, we will discuss your needs and wishes with exchanges of ideas and concepts taking place.
  - design fee is given.
  - you are given a "Landscape Checklist" to communicate your preferences to me.
2. Second meeting, a preliminary landscape plan will be revised by you and reviewed by me.
3. Final meeting, I will give a presentation of a landscape plan and estimate describing the work and cost breakdown of your project. ( photos of plants and various materials will be shown as well).
